# ENVIRONMENTAL POLICY

Environmental protection, including pollution prevention, is one of the highest priorities of SVITAP s.r.o.

To meet the company's environmental targets, the management has undertaken the following commitments:

1. Discharging legal requirements by ensuring compliance with in-effect environment laws, regulations, and standards pertaining to the development, manufacture, storage, transport, and trading of our products.
2. Designing products with a view to minimizing environmental impact during the manufacturing process and subsequent use.
3. Preventing any and all forms of environmental pollution.
4. Educating staff and encouraging attitudes conducive to the conservation of the natural world.
5. Providing information on the environmental impact of the company's operations.
6. Maintaining an environmental management system conforming to global standards.
7. Setting realistic, attainable environmental protection targets, verifying compliance therewith, and thus continuously improving the quality of environmental protection.
